User Guide

VIA Cinema

1. Introduction.

This user guide is made for users of the VIA Cinema program. Following this guide, users will be able to create reservations, view schedules(projections) and use other features of the program.

2. Using the program.

Upon starting the program, the program will automatically attempt to connect to the server, after connecting, a choice will be presented to the user:

```
Hello,establishing connection . . .
Connection established !
1.Choose cinema
0.Quit
```
Fig 1 – first menu

Here, the user can quit or can choose a cinema on which all future actions of the current session will be involved with.

```
Index|Data
1|Id:2|location:location2
2|Id:1|location:location1
```
Fig 2 – Listing of available cinemas

To choose "Choose cinema", the user needs to type in the corresponding number and hit enter. Upon this, a list of available cinemas will be shown, together with their location. To choose one of them, the index of the desired cinema should be entered in the console. After this, the user needs to confirm their selection.

```
1.Choose username
0.Quit
```
Fig 3 – second menu

Now the user is presented with the second menu, and the choice to choose the username, or quit the program.
On choosing option one, the user will have to input their desired username, and confirm that their choice is correct.

```
1.View your reservations
2.Create a new reservation for current cinema
3.View todays projections
4.Delete a reservation
0.Quit
```
Fig 4 – third menu, the main menu

After confirming their username, the user is shown the third menu – the main menu. From here, the user can use the main features of the program.

There are 4 options the user can use at his own discretion:

1. View your reservations (shows a list of all reservations of the current user at the current cinema)

2. Create a new reservation for current cinema(creates a new reservation for the current user, for one of the projections at the current cinema)

3. View todays projections(shows a list of projections starting in the following 24 hours for the current cinema)

4. Delete a reservation (shows a list of reservations belonging to the current user, these can be deleted by selecting them by index)

And quit (quits the program, asks for confirmation).
