ITEM	VALUE
UseCase	Choose cinema
Summary	The user has to choose one of the available cinemas on which he will take further actions or quit.
Actor	User
Precondition	There are available cinemas
Postcondition	The program is going to use the chosen cinema.
Base Sequence	1. Choose "Choose cinema". 2. A list of cinema is shown. 3. Type in the index of your chosen cinema. 4. Confirm if the chosen cinema is correct.
Branch Sequence	Whenever the user can choose a cinema he repeats the steps above.
Exception Sequence	If the user chooses an index that is not in the list an error will appear.
Sub UseCase	
Note
